

HIPAA Compliant remote care dashboard that provides tools for clinicians to **monitor acute or chronic patients remotely** and react quickly according to provider care pathways. An efficient and easy to use solution that aligns clinical workflows for the care team and increases patient access to care.

Anelto's Remote Care delivers advanced tools that provide a higher level of care that results in **better patient outcomes** which leads to a **better quality of life.**

PATIENT ON-BOARDING & SETUP

Efficient practice and patient onboarding including intake forms for demographics, custom kits and assessments. No logistical burden for the care team.

CLINICAL PATHWAYS

All customizable care surveys and assessments that are provider specific. Clinician access to healthcare questionnaires that help assess the overall health of the patient.

UNIQUE CALENDAR & WORKFLOWS

Provider and patient specific medication reminders, patient surveys, educational care calendar and more!

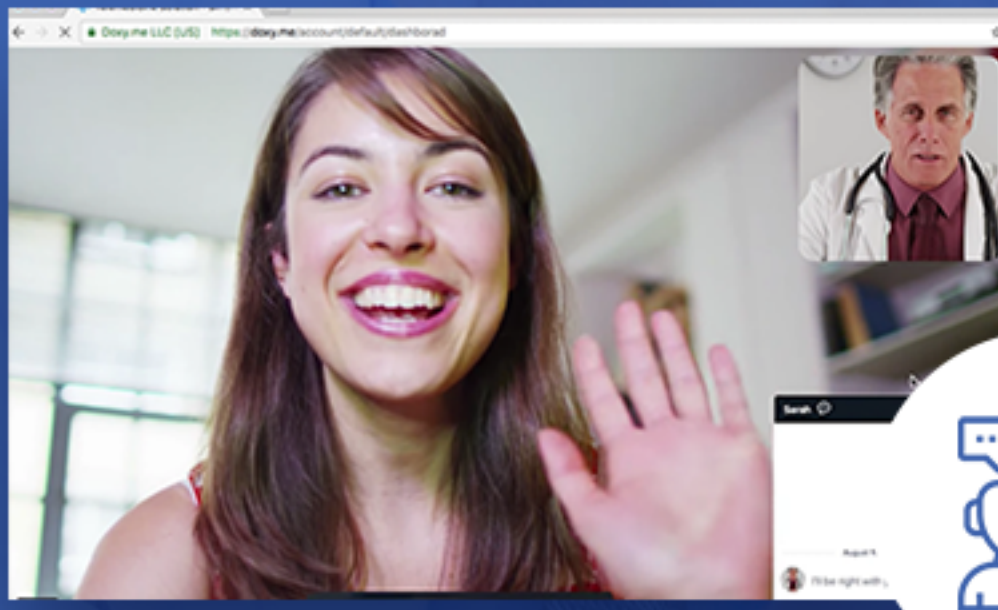

SEVERITY QUEUING

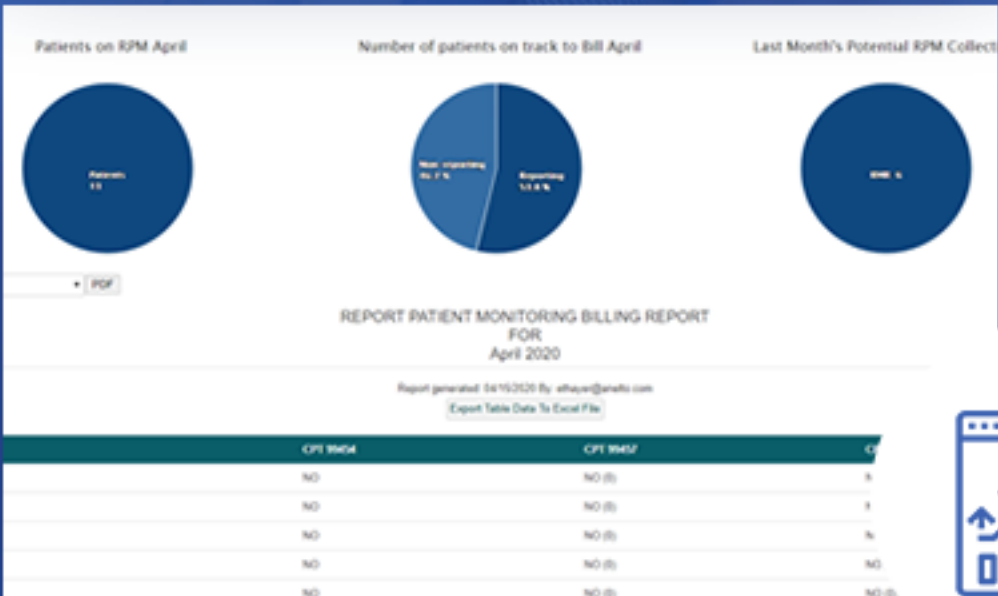

Biometric severity queuing with quick access to medical intervention when indicated.

Simple customization for Provider specific clinical pathways and the ability to modify based on patient an/or population parameter

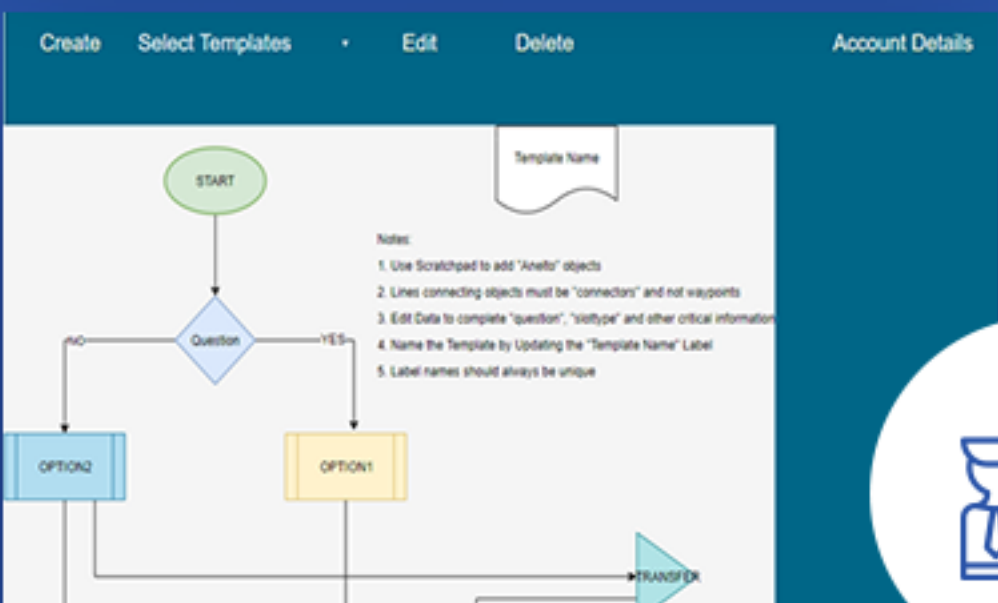

FEATURES

Ability to drive and schedule easy to use video consults for provider and patients. Provides video ability for the care team for complex situations.

Monthly, automated billing reports that are aligned by patient, the appropriate CPT codes and the provider. These help provide necessary information to expedite billing.

Provider developed conversational AI assessments that engage the patient and capture real time data for proactive intervention. These assessments are easily customizable and editable to meet provider requirements. Can be scheduled as part of a care calendar or included as part of a specific provider's clinical pathways.
